

# Project Highlight

## Big Dandy Jeans Store Passau, Germany

Spray-Lock Premium Eco Adhesives are designed to keep your floors in place, year after year. Even with heavy foot traffic the flooring bond will not fail. This project was completed in 2006 and as evident in the pictures the adhesive is still going strong – more than 15 years later!

### OVERVIEW

This German clothing store was in need of a renovation, so Ziegler Raumsaustattung GmbH was hired to fit the new flooring. The flooring needed to hold up to daily use with heavy foot traffic so two different types of LVT planks in a realistic embossed wood-look design were selected.

The store required a fast installation, since any downtime would be a loss in revenue. Spray-Lock SL-22 spray adhesive was chosen to adhere the planks to the dust-free subfloor. With SL-22, the installers were able to spray the adhesive while on their feet, eliminating any installer knee fatigue. After installation the clothing racks and displays were immediately brought back with no waiting time.

### PROJECT DATA

#### PROJECT

Big Dandy Jeans Store  
Passau, Germany

#### INSTALLER

Ziegler Raumsaustattung GmbH  
Ruderting, Germany

#### ADHESIVE USED

Spray-Lock SL-22

#### TOTAL AREA

1,300 m<sup>2</sup>
